- Micro SD Card Guidelines
- 1. It is recommended to use a good quality and branded Micro SD Card from 8-256GB. Minimum Class10.

2. It is recommended to format the SD card for better compatibility when a card is used in this camera for the first time. The camera is designed to do this automatically. If any problem this can be manually done within the APP settings. 3. Please insert the SD card in the correct way, as point 11 above. Close the rubber weatherproof cover fully by pressing it evenly into place. This will retain the IP rating and ensure there is no water or dust ingress.
